

Year 1 – Spring 2 – Types of animals – Would a carnivore eat a herbivore?

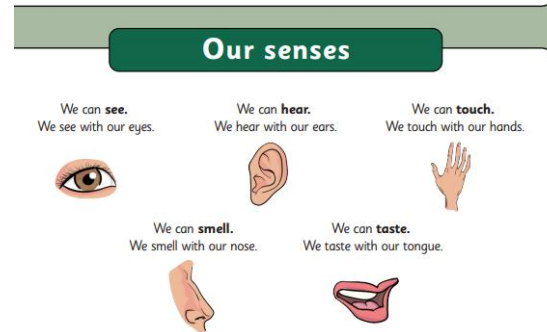

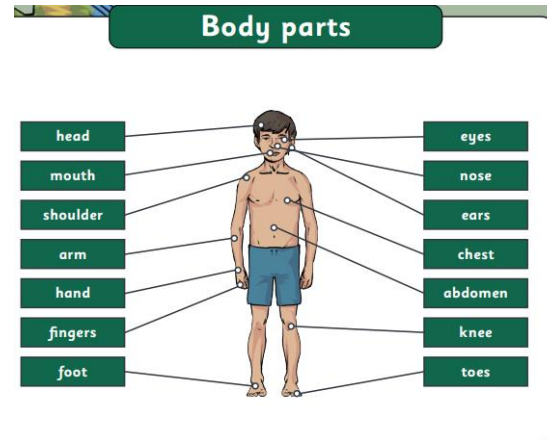

Key Vocabulary

Amphibians 	Amphibians live in the water as babies and on land as they grow older. They have smooth, slimy skin.
Birds 	All birds have a beak, two legs, feathers and wings.
Fish 	Fish live and breathe under water. They have scaly skin, fins to help them swim and they breathe through gills.
Mammals 	Mammals are animals that breathe air, grow hair or fur and feed on their mother's milk as a baby
Reptiles 	All reptiles breathe air. They have scales on their skin
Carnivore 	Animals that mostly eat other animals (meat) are carnivores.
Herbivore 	Animals that only eat plants are Herbivores.
Omnivore 	Animals that eat both plants and other animals are omnivores.
Plants 	Plants are living things that grow from the soil and turn light from the Sun into food.
Cold-blooded 	Cold-blooded animals are always the same temperature as it is outside.
Warm-blooded 	Warm blooded animals are always warm.

Prior knowledge

In Autumn term we:

- Identified, named, drew and labelled the basic parts of the human body and say which part of the body is associated with each sense.
- Described and compared the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets)

Knowledge and Assessment:

- Identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals.
- Identify and name a variety of common animals that are carnivores, herbivores and omnivores.
