## National Curriculum 2014

## Statutory Requirements Year 3

This document contains all of the statutory requirements of the National Curriculum (2014) broken down by subject. Please note this document should also be read in conjunction with the English and Maths appendices.

The document is to support the long, medium and short term planning processes to ensure both full coverage and progression. In the non-core subjects it is important that Key Stage teams plan for progression as this is not prescribed within the curriculum document. This document will be used in planning to ensure all elements of the core areas are covered within the National Curriculum Year Group.

			ENGLISH			
Spoken Word	Word Reading	Comprehension	Writing – transcription	Writing – Handwriting	Writing – Composition	Writing – Grammar, Vocabulary and Punctuation
Pupils should be taught to:  listen and respond appropriately to adults and their peers  ask relevant questions to extend their understanding and knowledge  use relevant strategies to build their vocabulary articulate and justify answers, arguments and opinions  give well-structured descriptions, explanations and narratives for different purposes, including for expressing feelings maintain	Pupils should be taught to: apply their growing knowledge of root words, prefixes and suffixes (etymology and morphology) as listed in English Appendix 1, both to read aloud and to understand the meaning of new words they meet read further exception words, noting the unusual correspondence s between spelling and sound, and where these occur in the word.	Pupils should be taught to:  develop positive attitudes to reading and understanding of what they read by:  listening to and discussing a wide range of fiction, poetry, plays, non-fiction and reference books or textbooks  reading books that are structured in different ways and reading for a range of purposes  using dictionaries to check the meaning of words that they have read  increasing their familiarity with a wide range of books, including fairy stories, myths and legends, and retelling some of these orally  identifying themes and conventions in a wide range of books preparing poems and play scripts to read aloud and to perform, showing understanding through intonation, tone, volume and action	Spelling (see English Appendix 1)  Pupils should be taught to:  use further prefixes and suffixes and understand how to add them (English Appendix 1)  spell further homophones  spell words that are often misspelt (English Appendix 1)  place the possessive apostrophe accurately in words with regular plurals [for example, girls', boys'] and in words with irregular plurals [for example, children's]  use the first two or three letters of a word to check its spelling in a dictionary  write from memory simple sentences, dictated by the teacher, that include words and punctuation taught so far.	Pupils should be taught to:  use the diagonal and horizontal strokes that are needed to join letters and understand which letters, when adjacent to one another, are best left unjoined increase the legibility, consistency and quality of their handwriting [for example, by ensuring that the downstrokes of letters are parallel and equidistant; that lines of writing are spaced sufficiently so that the ascenders and descenders of letters do not touch].	Pupils should be taught to: plan their writing by:  discussing writing similar to that which they are planning to write in order to understand and learn from its structure, vocabulary and grammar  discussing and recording ideas draft and write by:  composing and rehearsing sentences orally (including dialogue), progressively building a varied and rich vocabulary and an increasing range of sentence structures (English Appendix 2)  organising paragraphs around a theme  in narratives, creating settings, characters and plot  in non-narrative material, using simple organisational devices [for example, headings and sub-headings]  evaluate and edit by:	Pupils should be taught to: develop their understanding of the concepts set out in English Appendix 2 by: extending the range of sentences with more than one clause by using a wider range of conjunctions, including when, if, because, although  using the present perfect form of verbs in contrast to the past tense  choosing nouns or pronouns appropriately for clarity and cohesion and to avoid repetition  using conjunctions, adverbs and prepositions to express time and cause  using fronted adverbials  learning the grammar for years 3 and 4 in English Appendix 2  indicate grammatical and other features by:  using commas after fronted adverbials

		Scien	ce		
Working Scientifically	Plants	Animals, inc Humans	Rocks	Light	Forces & Magnets
During years 3 and 4, pupils should be taught to use the following practical scientific methods, processes and skills through the teaching of the programme of study content:  - asking relevant questions and using different types of scientific enquiries to answer them  - setting up simple practical enquiries, comparative and fair tests  - making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers  - gathering, recording, classifying and presenting data in a variety of ways to help in answering questions  - recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables  - reporting on findings from enquiries, including oral and written explanations, displays or presentations	Pupils should be taught to:  identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers  explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant  investigate the way in which water is transported within plants  explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal.	Pupils should be taught to:  identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat  identify that humans and some other animals have skeletons and muscles for support, protection and movement.	Pupils should be taught to:  compare and group together different kinds of rocks on the basis of their appearance and simple physical properties  describe in simple terms how fossils are formed when things that have lived are trapped within rock  recognise that soils are made from rocks and organic matter.	Pupils should be taught to:  recognise that they need light in order to see things and that dark is the absence of light  notice that light is reflected from surfaces  recognise that light from the sun can be dangerous and that there are ways to protect their eyes  recognise that shadows are formed when the light from a light source is blocked by a solid object  find patterns in the way that the size of shadows change.	Pupils should be taught to:  compare how things move on different surfaces  notice that some forces need contact between two objects, but magnetic forces can act at a distance  observe how magnets attract or repel each other and attract some materials and not others  compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials  describe magnets as having two poles  predict whether two magnets will attract or repel each other, depending on which poles are facing.

of results and conclusions			
<ul> <li>using results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions</li> </ul>			
<ul> <li>identifying differences, similarities or changes related to simple scientific ideas and processes</li> </ul>			
<ul> <li>using straightforward scientific evidence to answer questions or to support their findings.</li> </ul>			

Art & Design	Computing	Geography	History	Design &	MFL	Music	PE
				Technology			
Pupils should be taught to develop their techniques, including their control and their use of materials, with creativity, experimentation and an increasing awareness of different kinds of art, craft and design. Pupils should be taught:	Pupils should be taught to: design, write and debug programs that accomplish specific goals, including controlling or simulating physical systems; solve problems by decomposing them into smaller parts use sequence, selection, and repetition in programs; work with variables and various	Pupils should extend their knowledge and understanding beyond the local area to include the United Kingdom and Europe, North and South America. This will include the location and characteristics of a range of the world's most significant human and physical features. They should develop their use of geographical knowledge, understanding and skills to enhance their locational and place knowledge.  Pupils should be taught to:	Pupils should continue to develop a chronologically secure knowledge and understanding of British, local and world history, establishing clear narratives within and across the periods they study. They should note connections, contrasts and trends over time and develop the appropriate use of historical terms. They should regularly address and sometimes devise	Through a variety of creative and practical activities, pupils should be taught the knowledge, understanding and skills needed to engage in an iterative process of designing and making. They should work in a range of relevant contexts [for example, the home, school, leisure, culture, enterprise, industry and the wider	Pupils should be taught to:  listen attentively to spoken language and show understanding by joining in and responding explore the patterns and sounds of language through songs and rhymes and link the	Pupils should be taught to: play and perform in solo and ensemble contexts, using their voices and playing musical instruments with increasing accuracy, fluency, control and expression improvise and compose music for a range of purposes	Pupils should be taught to:  use running, jumping, throwing and catching in isolation and in combination  play competitive games, modified where appropriate [for example, badminton, basketball, cricket, football, hockey,

books to record their observations and use them to review and revisit ideas

to improve their mastery of art and design techniques, including drawing, painting and sculpture with a range of materials [for example, pencil, charcoal, paint, clay]

about great artists, architects and designers in history. forms of input and output

use logical reasoning to explain how some simple algorithms work and to detect and correct errors in algorithms and programs

understand computer networks including the internet; how they can provide multiple services, such as the world wide web; and the opportunities they offer for communication and collaboration

use search technologies effectively, appreciate how results are selected and ranked, and be discerning in evaluating digital content

select, use and combine a variety of software (including internet services) on a range of digital devices to design and create a range of programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information

use technology safely, respectfully and responsibly; recognise Locational knowledge

locate the world's countries, using maps to focus on Europe (including the location of Russia) and North and South America, concentrating on their environmental regions, key physical and human characteristics, countries, and major cities

name and locate counties and cities of the United Kingdom, geographical regions and their identifying human and physical characteristics, key topographical features (including hills, mountains, coasts and rivers), and land-use patterns; and understand how some of these aspects have changed over time

identify the position and significance of latitude, longitude, Equator, Northern Hemisphere, Southern Hemisphere, the Tropics of Cancer and Capricorn, Arctic and Antarctic Circle, the Prime/Greenwich Meridian and time zones (including day and night)

Place knowledge understand geographical similarities and differences

historically valid questions about change, cause, similarity and difference, and significance. They should construct informed responses that involve thoughtful selection and organisation of relevant historical information. They should understand how our knowledge of the past is constructed from a range of sources. In planning to ensure the progression described above through teaching the British, local and world history outlined below, teachers should combine overview and depth studies to help pupils understand both the long arc of development and the complexity of specific aspects of the content. Pupils should be taught about:

changes in Britain from the Stone Age to the Iron Age

the Roman Empire and its impact on Britain

the Viking and Anglo-Saxon struggle for the Kingdom of England to the time of Edward the Confessor

a local history study-

environment].

When designing and making, pupils should be taught to:

## Design

use research and develop design criteria to inform the design of innovative, functional, appealing products that are fit for purpose, aimed at particular individuals or groups

generate, develop, model and communicate their ideas through discussion, annotated sketches, crosssectional and exploded diagrams, prototypes, pattern pieces and computeraided design

## Make

select from and use a wider range of tools and equipment to perform practical tasks [for example, cutting, shaping, joining and finishing], accurately

select from and use a wider range of materials and components, including construction materials, textiles and ingredients, according spelling, sound and meaning of words

engage in conversations; ask and answer questions; express opinions and respond to those of others; seek clarification and help\*

speak in sentences, using familiar vocabulary, phrases and basic language structures

develop accurate

pronunciation and intonation so that others understand when they are reading aloud or using familiar words and

present ideas and information orally to a range of audiences\* read carefully and

phrases\*

show understanding of words, phrases and simple writing using the interrelated dimensions of music

listen with attention to detail and recall sounds with increasing aural memory

use and understand staff and other musical notations

appreciate and understand a wide range of high-quality live and recorded music drawn from different traditions and from great composers and musicians

develop an understanding of the history of music. netball, rounders and tennis], and apply basic principles suitable for attacking and

defending

develop flexibility, strength, technique, control and balance [for example, through athletics

and gymnastics]

perform dances using a range of movement patterns

take part in outdoor and adventurous activity challenges both individually and within a team

compare their performances with previous ones and demonstrate improvement to achieve their personal best.

acceptable/unacceptable behaviour; identify a range of ways to report concerns about content and contact.  through the study of human and physical geography of a region of the United Kingdom, a region in a European country, and a region.
